Daniel Craig leads an eleven-actor ensemble cast as Benoit Blanc, a famed private detective who is summoned to investigate the death of the bestselling author Harlan Thrombey (Christopher Plummer). Police rule Harlan's death a suicide but Blanc suspects foul play, and investigates to ascertain the true cause of his death. Johnson produced Knives Out with his longtime collaborator Ram Bergman. Funding came from MRC and tax subsidies from the Massachusetts state government. Johnson conceived Knives Out in the mid-2000s. Wanting to modernize the whodunit films of the mid-twentieth century, the director was inspired by his interest in movie adaptations of Agatha Christie's stories. He then refocused on creating Star Wars: The Last Jedi (2017). Development of Knives Out resumed the following year, when Johnson wrote the screenplay in six to seven months. Principal photography on Knives Out began in October 2018 on a \$40 million budget and ended that December. Location filming took place in suburban Boston. Nathan Johnson composed the film's classical score, which was inspired by his and Rian's favorite symphonic movie scores. Knives Out has been read as a work that investigates class warfare, wealth inequality, immigration, and race in contemporary American society. Knives Out premiered at the 44th Toronto International Film Festival on September 7, 2019, and was distributed by Lionsgate to American theaters on November 27. The film was a critical and commercial success; the National Board of Review and the American Film Institute chose it as one of the year's top films, and it grossed \$312 million. Critics praised the film's plot and actors, but criticized some aspects of its writing and performance. Knives Out was nominated for multiple awards, including three Golden Globes, a British Academy Film Award, and an Academy Award for Best Original Screenplay. Knives Out is the first entry of a franchise that also includes Glass Onion (2022) and Wake Up Dead Man (2025). Daniel Craig plays Benoit Blanc, a private detective anonymously hired to investigate Harlan's death. Chris Evans plays Hugh Ramsom Dysrdsale, Linda and Richard's son and Harlan's grandson, who manipulates Marta into confessing to him and offers assistance in exchange for a portion of Marta's inheritance. Ana de Armas plays Marta Cabrera, Harlan's nurse, who believes she injected Harlan with a lethal dose of morphine after mixing up his medications, unaware that she has been bequeathed his entire fortune and property. Jamie Lee Curtis plays Linda Dysrdsale, Harlan's eldest daughter, who learns of her husband's cheating from a letter left to her by Harlan using vanishing ink that her husband fails to keep from her. Michael Shannon plays Walt Thrombey, Harlan's youngest son, who unsuccessfully attempts to influence Marta to renounce the inheritance, even threatening to have her undocumented mother deported. Don Johnson plays Richard Dysrdsale, Linda's husband, whose cheating on his wife Harlan threatened to expose, possibly giving him a motive for murder. Toni Collette plays Joni Thrombey, widow of Harlan's deceased son Neil, whose allowance Harlan cut off after finding out that she has been double-dipping on expenses she charged to Harlan. Christopher Plummer plays Harlan Thrombey, an 85-year-old best-selling crime novelist who protects Marta from being blamed for his death by instructing Marta to create a false alibi before he slits his own throat. The family of wealthy mystery novelist Harlan Thrombey attends his 85th birthday party at his Massachusetts estate. The next morning, Harlan's housekeeper Fran discovers him dead with a slit throat. Police detectives Lieutenant Elliot and Trooper Wagner believe Harlan died by suicide, but private detective Benoit Blanc is anonymously hired to investigate Harlan's death. Blanc learns Harlan had strained relationships with his family members, giving several of them plausible motives for murder. Unbeknownst to Blanc, Harlan's nurse Marta's abrupt moves the injected Harlan with a lethal dose of morphine after mixing up his medications thought that the patient. To protect Marta from being blamed for his death, Harlan instructed Marta to create a false alibi before he slit his own throat, so she would be seen leaving the house, sneak back in through a window, and disguise herself as Harlan in order to make it appear that he was alive after she left for the night. Marta cannot lie without vomiting, so she gives accurate but incomplete answers when questioned. She agrees to assist Blanc's investigation and conceals evidence incriminating her. At the reading of Harlan's will, Marta is bequeathed his entire fortune and property, stunning the Thrombeyes. Harlan's grandson Ramsom Dysrdsale helps Marta flee but manipulates her into confessing to him. Ramsom offers further assistance in exchange for a portion of Marta's inheritance. Meanwhile, the other Thrombeyes unsuccessfully attempt to influence Marta to renounce the inheritance, even threatening to have her undocumented mother deported. Marta receives a blackmail note containing a partial photocopy of Harlan's toxicology report. She and Ramsom drive to the medical examiner's office, only to find it burned down. Marta receives an email proposing a meeting with the blackmail; Blanc and the police spot them, and after a brief car chase, Ramsom is arrested. At the meeting, Marta finds that Fran, the blackmailer, has been drugged; she performs cardiopulmonary resuscitation on Fran and calls an ambulance. Marta confesses to Blanc, but discovers Ramsom has already implicated her. Out of moral obligation, Marta believes she must confess to the Thrombeyes, which would invalidate the bequest under the slayer rule. At the mansion, Marta finds Fran's copy of the full toxicology report, which shows Harlan had only trace amounts of morphine in his blood. Blanc reveals his deductions to the police, Marta, and Ramsom. Blanc deduces Randt Ransom about his will, prompting Ramsom to swap Harlan's medicines to cause Marta to kill him unknowingly. However, Marta actually gave Harlan the correct medication, recognizing it by viscosity without reading the label due to her experience as a nurse; she only believed she had poisoned Harlan after reading the label on the bottle with the switched content. When the death was reported as a suicide, Ramsom anonymously hired Blanc to entrap Marta. Fran saved the commercial distribut with MRC partnered with Lionsgate, which was trying to avoid a year of mediocre box office showings and the purchase of the film's distribution rights.[119] Daniel Craig in 2022. Craig has credited Johnson for his career. Bond's repertoire. Employing an ensemble cast of established stars was one of Johnson's initial demands. He drew upon the Agatha Christie movies—chiefly Peter Ustinov-starrd projects a la Death on the Nile (1978) and Evil Under the Sun (1982)—for his casting choices because he felt they have a sense of spectacle that was worth replicating.[18] The filmmakers focused on actors who were available in the six week period before filming for Knives Out began. Actors were chosen for their ability to stand out in bit speaking parts and master an exaggerated-but-not-caricatured, comic performance.[18] According to Johnson, the film's rapid progress readily facilitated his casting ambitions.[12] Most of the Knives Out ensemble were signed in October and November 2018.[a] Johnson named each of the characters after musicians whose works he enjoyed because it was a simple practice to remember—for example, Joni Mitchell, Richard Thompson, and Steely Dan's Donald Fagen.[29] Daniel Craig came to Johnson's attention for his stage work and non-James Bond film roles. Johnson regarded Craig as a versatile actor who wanted to challenge his abilities in a playful comedy role.[12][18] Craig declined the offer due to his contractual obligations to No Time to Die (2021), which was preparing to film around the same time, but logistical and creative disputes postponed the film's production by three months, giving Craig enough time to accept Johnson's offer.[11][30] Once Craig read his copy of the script, he agreed to join because the writing's tone and humor captivated him.[11][31] The treatment of Blanc was initially a fruitless task for Johnson; his first concept had been a Hercule Poirot clone "that was just a bunch of crazy quirks". To distinguish the character, Johnson outlined Blanc as a slightly pompous man with a flamboyant Southern accent, turning to Craig's ongoing feedback for a unique characterization.[6] Craig undertook speech training with a dialect coach for two-to-three hours per day, studying playwright Tennessee Williams and author Shelby Steele via interview footage from C-SPAN and the Ken Burns-helmed docuseries The Civil War (1990) to model Blanc's voice.[32] Casting director Mary Vernieu was responsible for casting Marta Cabrera. Vernieu and the filmmakers did not favor a particular person for the part, unlike the other Knives Out characters, and based their search on Johnson's preference for a relatively unknown actor that could exhibit an underdog-like
quality.[33][34] They considered several candidates, including Ana de Armas, whose work piqued Vernieu's interest enough to be suggested in casting discussions.[33] Johnson was not familiar with de Armas' repertoire save for her starring role in Blade Runner 2049 (2017).[34] Johnson liked de Armas' acting but believed she appeared too sensual to convincingly portray Cabrera.[33][34] When Johnson met de Armas for her audition, he noticed her ability to emot, saying: "She's got that Audrey Hepburn-type thing, where her eyes just bring you in, and you're instantly on her side, and that's what we needed for the character." [34] De Armas never rejected the role because she found Cabrera's original character description clichéd; she was persuaded to accept after reading the complete script, which emphasizes resilience as a fundamental attribute of Cabrera.[35] Cabrera's immigrant backstory also resonated with de Armas.[36] For the self-indulgent Ramsom Dysrdsale, Johnson envisioned Chris Evans after seeing him in the 2018 Broadway revival of Kenneth Lonergan's Lobby Hero, having been impressed with his performance as a contemptible villain.[11][37] Evans was mainly known for his live action role as Captain America in the Marvel Cinematic Universe, and Johnson aimed to use Evans' everyman persona to create tension between moviegoers and Dysrdsale, saying: "You've got to see it not as baggage, but as ammunition. If there was someone in that part who the audience inherently wanted to like, that would help the arc overall." [37] Although Evans was preparing to take a hiatus after finishing his work on Avengers: Endgame (2019), he reconsidered when the producers told him they would be filming near his home in Massachusetts.[11] Toni Collette said her biggest purpose for playing Joni was to find humor in her character.[38] Christopher Plummer, in one of his final film appearances before his death in 2021,[39] described Harlan as a "stern, bright and rough-around-the-edges man with a child's sense of mor. [40] Michael Shannon did not audition for the role of Walt and was contracted following an arranged lunch with Johnson.[29] For the part of Linda, Jamie Lee Curtis sympathized with her backstory as a woman who is fiercely scrutinized for her privilege, and I am also the daughter of someone famous, and people have a funny way of taking away anything you do creatively and reduce it to your privilege. Linda is very defensive about the assumption that she was given anything, and I've had the same defense. [4] To prepare for her performance, Curtis immersed herself in activities she thought befitted her character's position as a matriarch, such as cooking meals.[44][41] Estate of the Ames Mansion (pictured in 2010), which doubled for the Thrombey residence in interior scenes. Bergman was assembling the filmmaking crew while Johnson revised the script in early 2018.[4] Johnson instructed the filmmakers to find an estate that exuded Harlan's mystery-writhing sensibilities, citing the thriller Sleuth (1972) as a reference for recognizable visual elements.[42][43] Bergman scouted several homes with his team before centering the film's production on two sprawling mansions in suburban Boston: a privately owned nineteenth-century Gothic Revival manor that was used for exterior shots, and Ames Mansion, a 20-room historic landmark in Borderland State Park in Easton.[43][44] Most of the interior shots, including tense, confrontational scenes with Harlan and his relatives and conversational scenes of Blanc's investigation, took place in Ames Mansion.[43] The production was challenged by the logistics of the mansions, neither of which had the sufficient space in the upper floors to realize Harlan's office or corresponding scenes. The production designer David Crank constructed the office set, which included an adjacent hallway, on soundstages, working closely with Johnson to coordinate the movement of characters with the configuration of the homes and artificial sets.[43] Principal photography began on October 30, 2018, on the working title Morning Bell, in Maynard, Massachusetts.[45][46] The filmmaker converted outdoor space into a laundromat in preparation for the first shoot.[47] Filming in Greater Boston, scenes were filmed near an MBTA passenger rail station in a private, mid-century modern eatery in Foxboro, Canton, Wellesley, Waltham, Medford, and an unoccupied, state-owned facility in Marlborough that was chosen for its round shape.[b] The Marlborough location was used for exterior scenes at the burned-down medical examiner's office; the scene involved pyrotechnics and a group of local firefighters were used as extras portraying the fire-fighting operation. [53] Filming for the project took approximately 38 days and ended on December 20, 2018.[54][55] Knives Out qualified for a \$10 million transferable tax credit on in-state costs from the Government of Massachusetts.[56] Knives Out was director of photography Steve Yedlin's fifth project with Rian Johnson. Yedlin and Johnson storyboarded their visual composition ideas before principal photography, which did not describe the onscreen universe in depth.[57] A double-camera setup was used with two operators, one a long-standing collaborator of Yedlin. Yedlin described the on-set environment as experimental and visually creative.[55] He filmed Knives Out in standard 1.85:1 aspect ratio using Alexa Mini cameras that were equipped with Zeiss Master Prime lenses. The Zeiss Prime's scaling capability supported the film's use of wide-angle shots. The filmmakers believed wider camera lenses emphasized the worldbuilding by showing characters in their surroundings.[55] They also used Panavision's PCZ Primo 19-90 and PZW 15-40 zoom lenses because zooming is customary in Johnson's oeuvre.[55] Yedlin and production members used action-building techniques that centered on Robert Altman's cinematic style, through a complex system of whip pans, zooming, and camera dolly movements. Panavision's Hollywood office loaned the production camera equipment.[55] Part of Knives Out's production was devoted to realizing a specialized process of color grading for the film's visual effects, based on qualitative data collected from Yedlin's field research.[55][57] Yedlin's usual strategy prioritized a lookup table (LUT) to augment a film's visual palette, and he observed photochemistry to create his color-grading formula.[55] The color grading was done with the help of a library called the Color Grading Center, which did not charge a fee. Yedlin said he wanted to explain any purpose for using color grading as an artistic choice, and he said that he did not want to be influenced by Christie's writings, which he considered anapolitical work that was attuned to British society rather than American.[49][66] Knives Out's color grading was done by the local firm of local firefighters were used as extras portraying the fire-fighting operation. [53] Filming for the project took approximately 38 days and ended on December 20, 2018.[54][55] Knives Out qualified for a \$10 million transferable tax credit on in-state costs from the Government of Massachusetts.[56] Knives Out was director of photography Steve Yedlin's fifth project with Rian Johnson. The Zeiss Prime's scaling capability supported the film's use of wide-angle shots. The filmmakers believed wider camera lenses emphasized the worldbuilding by showing characters in their surroundings.[55] They also used Panavision's PCZ Primo 19-90 and PZW 15-40 zoom lenses because zooming is customary in Johnson's oeuvre.[55] Yedlin and production members used action-building techniques that centered on Robert Altman's cinematic style, through a complex system of whip pans, zooming, and camera dolly movements. Panavision's Hollywood office loaned the production camera equipment.[55] Part of Knives Out's production was devoted to realizing a specialized process of color grading for the film's visual effects, based on qualitative data collected from Yedlin's field research.[55][57] Yedlin's usual strategy prioritized a lookup table (LUT) to augment a film's visual palette, and he observed photochemistry to create his color-grading formula.[55] The color grading was done with the help of a library called the Color Grading Center, which did not charge a fee. Yedlin said he wanted to explain any purpose for using color grading as an artistic choice, and he said that he did not want to be influenced by Christie's writings, which he considered anapolitical work that was attuned to British society rather than American.[49][66] Knives Out's color grading was done by the local firm of local firefighters were used as extras portraying the fire-fighting operation. [53] Filming for the project took approximately 38 days and ended on December 20, 2018.[54][55] Knives Out qualified for a \$10 million transferable tax credit on in-state costs from the Government of Massachusetts.[56] Knives Out was director of photography Steve Yedlin's fifth project with Rian Johnson. Yedlin and Johnson storyboarded their visual composition ideas before principal photography, which did not describe the onscreen universe in depth.[57] A double-camera setup was used with two operators, one a long-standing collaborator of Yedlin. Yedlin described the on-set environment as experimental and visually creative.[55] He filmed Knives Out in standard 1.85:1 aspect ratio using Alexa Mini cameras that were equipped with Zeiss Master Prime lenses. The Zeiss Prime's scaling capability supported the film's use of wide-angle shots. The filmmakers believed wider camera lenses emphasized the worldbuilding by showing characters in their surroundings.[55] They also used Panavision's PCZ Primo 19-90 and PZW 15-40 zoom lenses because zooming is customary in Johnson's oeuvre.[55] Yedlin and production members used action-building techniques that centered on Robert Altman's cinematic style, through a complex system of whip pans, zooming, and camera dolly movements.
